

GOVERNMENT OF ARUNACHAL PRADESH OFFICE
OF THE CHIEF SECRETARY
CIVIL SECRETARIAT ITANAGAR

File No.:IT-12013(11)/20/2017-DITC/

Dated 19/06/2025

ORDER

The Government of Arunachal Pradesh has successfully implemented the State Data Centre (SDC) project, which is fully operational since 1st April 2024. The Arunachal Pradesh SDC is a state-of-the-art facility that has been awarded ISO certifications, signifying its adherence to stringent quality management and environmental sustainability standards. The SDC is cloud-enabled and equipped with Disaster Recovery (DR) capabilities, thereby ensuring high availability, security, and scalability of digital infrastructure for government services.

However, it has been observed that several Offices, Departments, Directorates, and equivalent government bodies are currently hosting their applications and websites on paid NIC cloud services or private servers. This practice results in unnecessary duplicate expenditure, and more critically, fragmented infrastructure which poses challenges in ensuring:

- Centralized monitoring and management of government applications.
- Timely security updates and patches
- Standardized performance, compliance, and data governance
- Effective vulnerability assessment and risk mitigation

In view of the above, all Government Departments, Directorates, and affiliated entities are directed to migrate their respective applications and websites to the Arunachal Pradesh State Data Centre, Itanagar, without delay. This migration is crucial for creating a secure, efficient, and sustainable digital ecosystem across the state government. Nodal officer State data centre to coordinate for the necessary technical support and procedures related to migration.
